DANGEROUS DELAY.

There is another side to this story. There are known cases of dangerous delay in executing ernment work because army and navy officers or the civilian chiefs of various committees are afraid that they are being over-reached. When a country is raising billions upon billions of dollars a billion does not seem to be of particular moment, especially when the material which is to be bought of the construction work which is to be paid for are absolutely essential that other work may proceed—war work vitally necessary.

Here is a case in point: There has been a delay in one of the shipyards of the country because of a controversy between a representative body of the government and the shipbullding company over the question of payment for the frame buildings which it has been necessary to erect to house the thousands upon thousands of additional workmen needed in the construction work.

The amount involved is about a million and a half dollars. When the war is over and the emergency shipbullding work ceases the company will have in its possession a lot of frame houses erected for temporary use, and which will not be of any service to it. On the other hand, if the government pays for the houses and owns them it can make no use of them. The question arose as to who should pay for the building of the domiciles for the extra work-men.

For a long time the controversy has been going on, and figures, was the whole-souled determination of the voters to make their ballots count for the United States and against Germany. They wouldn't scratch and they voted the straight Republican and Democratic tickets in 75 per cent. of the 2440 precincts. The difference between the high man and the low man in the fusion ticket for Superior Court judges, in comparison with the total, will be negligible when the official totals are made.

The Socialist candidates badly disappointed themselves. Hoosted

into a self-hypnotism that caused the Socialist leaders to believe that they had a real chance to elect some or all of their candidates, the party workers were terribly disappointed tonight when they found that their candidates hadn't carried a single ward in Chicago.

In the north-end precincts of the Twenty-first Ward, where the so-called German-American vote was supposed to be on trial, the returns were altogether favorable to the pro-American candidates. The Socialists got their normal vote throughout that territory and no

Chicago went the whole route. The Socialists, paeifists, pro-Germans and disturbers generally were whipped to a standstill.

The majority for the fourteen candidates on the Fusion ticket for Superior and Circuit Court judges over the Socialist party nomines will average mighty close to the 100,000 mark. Complete returns from the wards, as they were being compiled at 11 o'clock tonight, indicated that the fusion victory had been perfect and that the Socialists and their anti-war allies had been driven into utter rout.

domiciles for the extra workmen. For a long time the controversy has been going on, and so far as one can determine it has not yet been settled. The government's representatives said that Uncle Sam would pay for the workmen's houses, provided the shipbuilding company would give the government a mortgage on its plant. This simply was beating the devil around the sump. The understanding is that the shipbuilding company said it would give the government a mortgage on the houses which it was to erect, but the government looked on this as a poor financial scheme, promising no returns for the money advanced to build the houses. Killed by Poisons

HUNGER STRIKE All scientists agree that poisonous products in the blood are eliminated by the kidneys and liver. The kidneys act as a kind of filter for these products. When the kidneys are changed or degenerated, by disease or old age, then these poisons are retained in the body. If we wish to prevent old age coming on too soon, or if we want to increase our chances for a long life, Dr. Pierce of the Invalids' Hotel, Buffalo, N. Y., says that you should drink plenty of water daily between meals to flush the kidneys. Then procure at your nearest drug store Anuric. This Anuric drives the uric acid out. Scientific men have learned that in gout, also rheumatism, poisonous uric acid crystals are deposited in or about the joints, in the muscles—where inflammation is set up.

If we wish to keep our kidneys in the best condition a diet of milk and vegetables, with only little meat once a day, is the most suitable. Drink plenty of hot water, take Anurio three times a day for a month. of stock to meet Russia's immediate needs.

Bids for the manufacture of approximately 2,260,000 pairs of shoes of a standard model adopted for civilian employees of the Russian government, chiefly railroad workers, munitions makers, and miners will be opened here Monday, but deliveries will not begin until January and will extend over a period of five months.

Every manufacturer of rubber overshoes in the country met today with an Auxiliary Committee of the Council of National Defense and agreed to turn over to the government for the army the entire output of four-buckle "arctics" from now until January 5. This will mean a total of about 399,000 pairs. Orders for rubber hip boots had been placed previously.

Baldness—Falling Hair

Dandruff, Gray, Dry or Oily Hair

is due to one cause: Lack of Minerals in the Blood which Feeds the Hair.

Impossible to Grow Hair by Outside Treatment with Tonics and Salves Alone; Only Way is to Feed It From the Blood.

Grow New and Healthy Hair in Abundance by Simple New Method

Eight years ago Dr. Hiller discovered that the Hair needs Lime, Sulphur and Silicon in order to grow and be healthy. The Hair obtains these elements from the circulating blood, which deposits them in the Hair papilla. He also discovered, by way of over two hundred analytical examinations, that all Hair and Scalp troubles are caused by the lack of these elements in the blood and Hair tissue. He found that he could grow new Hair and stop falling hair by supplying the blood with the lacking elements from the daily food. His method has been tested by thousands in Europe and is now for the first time introduced in the American Republic.

In the last seven years over six hundred thousand Dr. Hiller's Hair Treatments have been sold. Thousands of letters from successful patients prove the marvelous results. You can't afford to miss this treatment if you have Hair or Scalp troubles in any shape or form. You take no risk. A Money-Refund Guaranty is given you with your pur-

HOUSEKEEPERS Must be Watchful

For great efforts are being made in this vicinity to sell baking powders of inferior class, made from alum and lime phosphate, both undesirable to those who require high-grade cream of tartar baking powder to make pure and wholesome food.

The official Government tests have shown Royal Baking Powder to be an absolutely pure and healthful grape cream of tartar baking powder, and care should be taken to prevent the substitution of any other brand in its place.

Royal Baking Powder costs only a fair price per pound, and is cheaper and better at its price than any other baking powder in the world.

Candy Jars.

New and pretty candy jars come in silver deposit ware and in that dainty, clouded glass with handpainted flowers in natural tints. Now do not tell me that you shall forego the use of candy, at your house! Candy is wholesome and in moderation should be used. It is only in excess that we are asked to cease its partaking. Candy is a part of the balanced ration, and sweets are as greatly needed as are meats and breads.

While some of the annual rayers—men, of course—are taking the usual turn at eliminating camoundage for women, let us ask a question or two. Doubless the author of "Woman," who seemingly knows less about more women than most men who write about us, has broken out again in a frenzy sariart "paint and powder." While shouting for the face as naturel for women, has it ever occurred to him that it is far from natural for man to appear with smoothly shaven features the favore to deserve; to atempt to impose upon an unsuspecting feminine public who are thus led to believe the masculine friend possessed a peachy skin, free from instruct briars! Fing away the shaving brush and razors! Buy no more soap, since soap does not come natural it to laugh when men cry out against at artificial complexionry in women and point with pride to the natural bloom of some admired friend—who manages to don her rouge and whiting with excellent artificial remained that the worder of the company and under divided to the flow o

man who, standing in the audience, mentally slips it to his stage partner, Mile. Stantone, what to play on the piano, was about to go on the stage, a limb of the law presented him with an injunction served at the behest of Mr. Pantages, owner of Pantages circuit, stopping the thought transference expert from going on with his act, and claiming prior right to the services of Mercedes and Mile. Stantone.

The matter will come up in a department of the Superior Court this morning, and until the matter is legally settled. Orpheum audiences will have to do without the amasing spectacle of a blindfolded lady playing on the piano any selection about which you may be merely thinking, and which to hear you have only to say to the lady—and sotto voce to "Mercedea," if you choose—"Please play my selection."

INDICT ALLEGED

LIQUOR PEDDLER

Showing that the government is going after those persons who take liquor into a military reservation, the Federal grand jury yesterday returned an indictment against Tomaso Hernandez, who was found at Camp Kearny with ten half-pint bottles of liquor in his possession. It is understood that Hernandez was trying to dispose of the stuff to the troopers.

BEFORE GRAND JURY.

The appearance of Earl before the grand jury in the Cowald-Harper matter was next taken up, and his testimony there was reviewed, he being asked from time to time to confirm the statements he had previously made, and after some confision he or his counsel admitted the correctness of the transcript.

As to Earl's employment of Detective Blair, it was brought out that Blair called Earl by telephone one evening and told him he had some very important information to impart, and arrangement was made for him to go to Earl's office the next day. "I employed him some time after that." said the wilness. EH.C.L. 1 The price of finished steel has been cut to take effect January 1. But nobody of our acquaintance eats finished steel.

The people will expect Congress to tak that income tax exemption of them-ves the first Monday in December. No-ly wants Congress to be a hog. Everyise has to pay.

It is believed that the Wilson admin-stration is about to take a step toward allowing the raffroads an opportunity to in-crease their freight rates. It would be an act of justice long delayed. Never before in the history of railroading has it cost so much money to conduct a line.

Where is the Berliner ith patriotism so dead that he would at scratch for Vaterland?

Guns, Guns, Gunst
The brave Italian army needs assistance like the fellow needed a gun in Texas.
It is but a little while ago that the Italian mmissioners begged that guns be sent the forces of Gen. Cadorna. For some reason the request was not acceded to, and we see the result. There was blundering on the part of somebody. Meanwhile time goes on, and the American troops are not in the field. There are not arms enough to go around in the various cantonments.

TURN ABOUT.

A whale weighing two tons, evidently wounded in a whale fight off Santa Monica wounded in a whale fight off Santa Monica Bay; drifted into the surf near the California incline, was towed to Long Wharf village by Japanese fishermen and a whale steak feast was soon in progress. Even the big fish of the sea seem to have heard Hoover's call. If that sounds ridiculous then who shall say that Providence didn't have a hand in sending Mr. Whale along? It's just an easy for the Almighty today to prepare a big fish for good men as it was in Jonah's time for Him to feed a bad man to a hungry fish. Also, turn about is fair play.

CAN IT BE TRUE? CAN IT BE TRUE?

The faculty of the University of Illinois have been accused of anti-Americanism.

From a number of other institutions of learning all over the country are coming similar complaints. It is deplorable that a single college or school should be found between the two seas in which the faculty are disloyal to the principles of democracy. are disloyal to the principles of democracy upon which our educational system is founded and which it is the business of the teacher, first of all, to inculcate into the minds of the younger generation. The school is the last place in the land in which the traitor should be found and the first place from which he should be ejected when discovered.

TAMMANY'S VICTORY. The returns from New York City this morning indicate at least one glorious thing: the defeat of Morris Hillquit, the lip-Socialist candidate for Mayor of the greatest city in the Western Hemisphere. But the returns also indicate an inglorious feature of metropolitan political life, and it is this: the election of John F. Hylan to

the Mayoralty in succession to John Purroy Mitchel. the office; which is to say the Tammany Hall candidate. And also, by some strange alchemy of brain and power, Hylan has been accounted the Hearst candidate, the pro-German candidate and the anti-war candidate. He is in and Mitchel is out. Mr. Mitchel ran for the second term on a fusion ticket as an independent, though elected to the first term as a straight Democrat of the Wilson type. The other Mayoralty candidate in the field was William M. Bennett,

Republican.

Mitchel represented the good taste and the best judgment of American citizenry and he was called in some of the news disputches the American candidate for Mayor. He was at times also represented as the President's choice for the office, but the national administration, guided by the defeat of candidates it had indersed in special Congress elections back East during the past few months, kept hands off and none of the Cabinet officers was permitted to go to New York to electioneer for Mitchel. The administration did not care in these critical times to have it dinned into its ears that Wilson also was defeated into its ears that Wilson also was defeated in New York. It has escaped that opprobrium, but the election of Judge Hylan is by no means anything for the Democratic

rooster to crow about, especially if all is true that the opposing candidates had to say of him in the campaign.

Every cloud has a silver lining, and the silver lining to the cloud spreading over the political heavens like the bull's eye so feared. feared by mariners in the Caribbean is the defeat of Morris Hillquit, rampant and bla-

in some instances overwhelming. In some precincts he received more votes than the other candidates combined. So that it is not likely that the soldier vote, yet to be counted in the cantonments and probably also on the field in France, will materially

change the general result.

It should be said in passing and borne in mind by all students of the question that Mayor Mitchel was not defeated because he was the candidate of Americanism, but because he represented the reformers and the silk-stocking element in New York. The "Great White Way" detests the white

CONCERNING FILM CENSORSHIP. With its vast possibilities for visualizing objects and events, the cinematographic art HAS RE-GUN TO RIVAL, AND IN MANY IN-STANCES HAS SURPASSED, LITERA-TURE in conveying to a knowledge-hungry world information upon a thousand inter-esting topics in history, science, the vari-ous arts and professions and upon contem-

There is no object, no invention, no thought that can escape capture by the moving-picture camera, which is like a great, all-geeing eye moving about over the world, collecting upon its sensitive surface a million scenes and reflecting them again from a million white screens for the delight and edification of man. But it is in the world of fiction and of fancy that the magic of motion pictures is most apparent, in the fields of romance, comedy, tragedy and mythology. In the underworld, where poverty and disease walk hand in hand with crime; among the gilded palaces of sin, where idleness and dissipation are half-concealed by painted faces and silken drap-eries; in woodlands, where fairies dance; in the mountains, where trolls laugh and play; in the infernos of the brains of men, where dragons creep and serpents hiss and among the sunset gates of gold, where angels gather with shining harps and sing their twilight hymns—it is among such scenes as these that the motion-picture di from whose mystic isles are brought those wonderful stories so fascinating to old and young, wise and ignorant, noble and igno-The minds of men are ever reaching out: ever seeking sensation and knowledge; ever looking for the new and investigating the old in the fields of fact and fancy. because the moving-picture art is so definite in its revelations and so tremendous in its scope it has become the most popular, if not the most fascinating, of all the arts.

The influence of the moving picture in the American home, especially among the children, is naturally making itself felt, and while for the most part that influence is good, it is not always so. Because its scope is so broad and its influence so vast, the power of the moving picture for good or evil is inestimable. In view of this fact, it is not strange that people are beginning to ask: What effect do moving pictures in general have upon the growing minds of children, and what sort of pictures is it best for young people to see? A few days ago a woman told a local judge that the mind of her little son had become unbalanced through attending too many pictures of the dime-novel variety. Every now and ther cases are brought to light in which young men or women and sometimes mere children have been incited to criminal acts through the influence of the sensational and morbid in motion-picture drama. Such instances as these have caused a wave of and from parents and educators who have begun to appeal to the producers for wholesome, more decent dramas. The Parent-Teachers' Association in Los Angeles has appointed censors to tell the parents whether or not the pictures shown in those districts are fit for their children to see. There exists at present a National Board of Censors which passes upon most picture place its stamp of approval upon an inde-cent or suggestive drama. This organization, although sanctioned by the govern-ment, has no official connection with the

government and, even if it did have, there rould doubtless be times, as now, when questionable pictures would be passed by board. Every city in the country has its own laws and regulations against the indecent in art, and the officers are supposed to put a stop to any form of enter-tainment that is calculated to outrage or injure the moral consciouspess of the pub , killed is less; but it is a "solendid German impossible for the officers to see every picture that is profinced and, even if it were possible, it is most probable that they would often disagree among themselves at to just what is decent and what is not.

For some reason or other many producers and exhibitors seem to have become afflicted with the false idea that the majority of people enjoy the morbid and the vulgat in pictures, and because of this erroneous features have been placed upon screens—stories which, in literary f would be barred from the mails and which spoken drama, would hardly be toler ated by the decent denizens of Harbary bright and the wholesome in moving pic res as in all other branches of art. They do not want the morbid and the sensational, and the only reason they patronize this class of drama is usually either beor else they decide that it is better to s a bad picture than none. Throwing mud in the people's eyes neither develops their sense of the artistic nor does it appeal to the average man, woman or child, and the sooner the producers come to realize this the better it will be for them and for the picture business in general.

The City Council has turned down a pe

tition from a number of well-meaning citisens who appealed for the appointment local moving-picture censor. This is as it appoint a political czar to censor this ranch of art as it would be to gag the press or to throttle free speech. The Times believes that THE MOTION-PICTURE PRODUCERS AND EXHIBITORS WILL RE WISE ENOUGH TO CENSOR THEIR OWN PICTURES; that they will be able to see that they are losing money on the salacious, suggestive drama and that, from a box-office standpoint, the clean, bright, uplifting picture is the most desirable. The sensational and the morbid will doubtless be eliminated from the picture world—not through an enforced censorship, which be contrary to democratic government, but through the demand of the public and the business sagacity of the producers.

S PARE THE CALVES AND LAMBS. Food conservation would be helped by prohibiting the sale of year and the slaughter of calves. If these animals were per mitted to live two years, or even one year they would weigh from 800 to 1500 pounds whereas now they are killed when they are from four to six weeks old and weigh only 100 to 150 pounds. Prohibition against killing lambs and sucking pigs would also greatly increase the quantity and decrease the price of mutton and pork.

The Times is the friend of young cown

and young pigs and young sheep and be seeches for them a longer lease of life in this beautiful world than the lovers of year cutlets and lamb and pork chops would The railroad men report that the winter ourist arrivals are already beginning to

quets for the heroes as there were for the enough, this victory is not so great as that The number of women and children victory" nevertheless, as such victories go. A German cruiser wrecked a Swedish ateamer and then shelled the deck while the men and women were scrambling into the lifebonts. Yes, a typically German na val victory. The Allies regret the slaugh ter, of course. Unfortunately for their mili-tary prowess (at least in German eyes) they do not murder women; but, politically speaking, they might well wish Germany many such victories over fiwedish ships.

Sweden has been technically neutral, as neutral as a smuggler who finds it profitsble to trade with pirates; but even Swedish neutrality could not long endure such attention from the hands of German gunners. The German gunners may be excused, however. They must have victories. The Kal-ser requires it. And so if the cowardly English and American fleet won't come in where it can be mined, then must the bold German seamen sail out and destroy the neutral merchantmen that presume to come within German range-presume, simtion and have women on board. Is that any reason why Germany should not enjoy another notable naval victory? Not a bit. Women and children make corpses the same as men; and Germany reckons the magnitud of victory by the number of the slain.

THE CRIME OF IDLENESS.

Ruskin wrote, half a century ago: "There are idle poor and idle rich, and there are busy poor and busy rich. Many a beggar is as lazy as if he had ten thousand a year; and many a man of large fortune is busier than his errand boy and never would think of stopping in the street

In a large view the distinction between workers and idlers runs through the very heart and innermost nature of men of all ranks and in all positions. There is a working class-strong and happy-among both rich and poor; there is an idle classweak, wicked and miserable-among both rich and poor. And the worst of the misunderstandings arising between the two or ders comes of the unlucky fact that the wise of one class (how little wise in this) habitually contemplate the foolish of the other. If the busy rich people watched and rebuked the idle rich people all would be right among them; and if the busy poor people watched and rebuked the idle poor people all would be right among them. But each looks out for the fault of the other. A hard-working man of property is particu-larly offended by an idle beggar; and an orderly, but poor, workman is naturally intolerant of the licentious luxury of the rich. And what is severe fudgment in the minds of the just men of either class become flerce enmity in the unjust-but among the unjust only. None but the dissolute among the poor look upon the rich as their natural enemies or desire to pillage their and divide their property. None but the dissolute among the rich speak in oppr brious terms of the vices and follies of the

Aimighty God:

Aimighty God:
My dear Wilhelm:
I can cail you by that familiar name, for I have always been very close to you, much closer than you could ever know.

In the days of Rome I created a roughneck known in history as Nero; he was a vulgar character and suited my purpose at that particular time. In these modern days a classic demon and efficient supercriminal was needed, and as I know the Hohensollern blood I picked you as my special instrument to place on earth an annex of hell. I gave you abnormal ambition, likewise an oversupply of egotism, that you might not discover your own failings; I twisted your mind to that of a mad man with certain normal tendencies to carry you by, a meet dangerous character placed in power; I gave you the power of a hypnotist and a certain magnetic force, that you might away your people. I am responsible for the deformed arm that hangs helpless on your left, for your crippled condition embitters your life and destroys all noble impulses that might otherwise cause me anxiety, but your sword arm is driven by your ambition that squeiches all sentiment and pity; I placed in your soul a deep hatred for all things English; for of all nations an earth I hate England most; wherever England plants her fing she brings order out of chaos, and the hated Cross follows the Union Jack; under her rule wild tribes become tillers of the giebe, and I HATE HER. I planted in your soul a cruel hatred for your mother, because SHE was English, and left my good friend literarck to fan the finame I had kindled. Recent history proves how well our work was done. It broke your royal mother's heart, but I gained my purpose.

The inherited disease of the Nohensollerns ktiled your father, just as it will kill you, and you became the ruler of Germany and a tool of mine seconer than I expected.

THERE EVIL SPIRITS.

To assist you and further hasten my work I sent, you became the ruler of Germany and a tool of mine seconer than I expected.

"Tou have taken millions of dollors from innocent victims and called it indemnity; you have lived fat on the land you usurped and sent the real owners away to starvation. You have strayed away from all legalised war methods and introduced a code of your own. You have killed and robbed the people of friendly nations and destroyed their property. You are a liar, a hypocrite and a hisfer of the highest magnitude. You are a part of mine, and yet you nose as a personal friend of God. Ah. Wilhelm, you are a wonder. You wantonly destroy all things in your path and leave nothing for coming generations.

"I was amazed when I saw you form a partnership with the impossible Turk, the chronic killer of Christians, and you a devout worthing for coming generations." I confess, Wilhelm, you are a puzzle at times. A Mohammedan army, commanded by German officers, assisting one another in massacring Christians is a new line of warfare. When a Prussian officer can witness a nude woman heing disemboweled by a swarthy Turk, committing a double murder with one cut of his saher, and calmly stand by and see a house full of innocent Armenians locked un the house saturated with oil and fired, then my teachings did not atop with you, but have been extended to the whole German nation. I confess my Salanic soul grew sick and there and then I knew the pupil had become the master. I am a back number, and my dear Wilhelms, I abdicate in your favor. The creat key of hell will be turned over to you. The gavet that has struck the doom of damned souls since time began it your favor is for the very heat interest of hell—in the future. To assist you and further hasten my work I sent you three evil spirits, Nictasche, Treitschke and later Bernhardt, whose teachings inflamed the youths of Germany, who in good time would be willing and toyal subjects and eager to spill their blood and pull your chastnuts, yours and mins; the spell has been perfection was a subject and the partial and the Dardanelief, and you began your great railway to llagdad, but the ambitious Archduke and his more simbitious wife stood in your way. It was then that I sewed the seed in your beart that blossomed into the assassination of the Duke and his wife, and all hell smiled when it saw how cleverly you saddled the crime on to Sethia. you set the world on fire and bells of hell were ringing; your rape on Belgium caused much joy, it was the beginning, the foundation of a perfect hell on earth, the destruction of noble cathedrals and other infinite works of art was halled with joy in the infernal regions. You made war on friends and foe alike and the murder of civilians showed my teachings had borne fruit. Your treachery toward neutral nations hastened a universal upheaval, the thing I most desired. Your undersea warfare is a master stroke, from the smallest mackerel pot to the great Lusitania you show no favorites; as a war lord you stand suppreme, for you have no mercy; you have no consideration for the baby clinging to its mother's breasts as they both go into the deep together, only to be torn apart and leisurely devoured by sharks down among the corals.

I have seen the fields of Poland; now a wilderness fit for prowling beasts only; no merry children in Poland now; they all succumbed to frost and starvation—I drifted down into Calicia, where formerly Jews and Gentiles lived happily together; I found but ruins and ashes; I falt a curious pride in my pupil, for it was all above my expectation. I was in Heigium when you drove the peaceful population before you like cattle into slavery; you separated man and wife and forced them to hard labor in trenches. I have seen the most fiendish rape committed on young women and those who were forced into maternity were curving the father of their offspring, and I began to doubt if my own infernowas really up to date.
